Vitoli® Axial Bl@wer

RPZ500-150-6

CHARACTERISTICS

- 1. High temperature resistant: RPZ series can work continuously for about 30 minutes at a medium temperature of 280°.
- 2. Constructed of whole turned flange and integrally formed wheel hub, which results in durable and beautiful shape.
- 3. Widely used in the local architecture, there are two drive style: single speed and twin speed, currently used for ventilation but for smoke exhausting when it is to fire fighting.
- *** Used in the high building, parking garage, oven, tunnel where need ventilation and fire exhausting.
